

ISaGRAF V5 Software workbench

LT200

RIOM

ACS

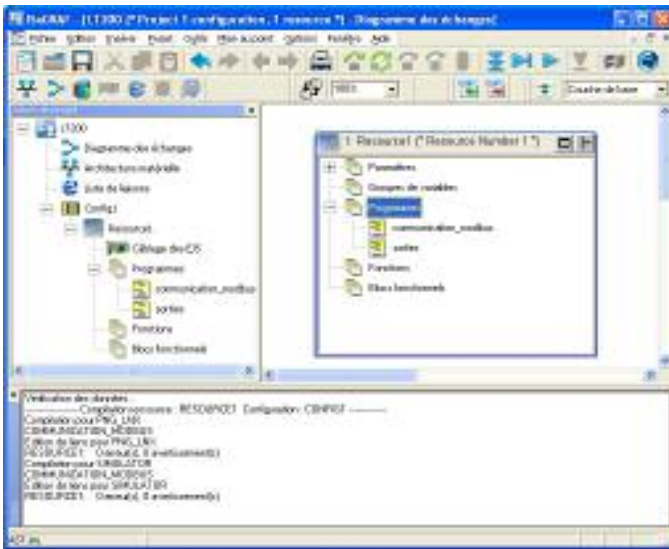

The ISaGRAF V5 workbench allows to develop applications on LT200, ACS and RIOM hardware platforms.

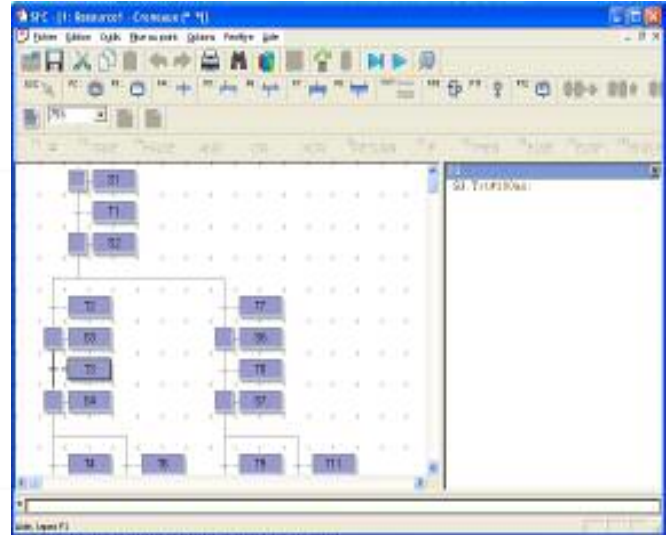

In accordance with IEC61131-3 norm, the workbench allows to design applications in Sequential Flow Chart (SFC-Grafset), Structured text (ST), Ladder diagram (LD), Instruction List (IL), Flow Chart (FC - logic diagram).

ISaGRAF Virtual Machine exploits the Linux 2.6 operating system.

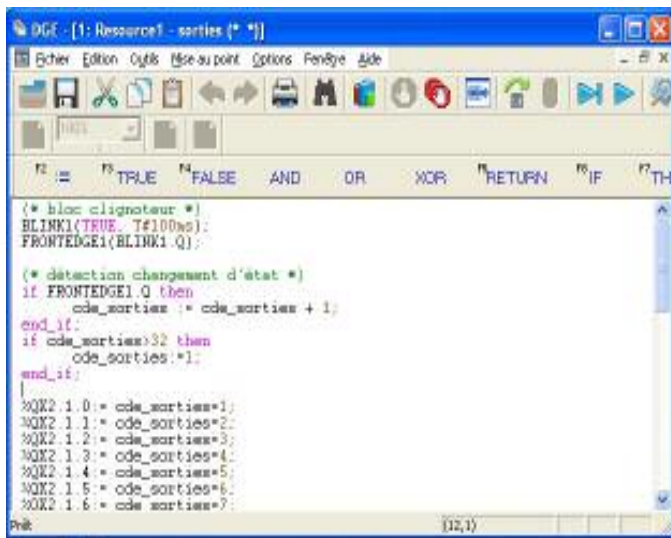

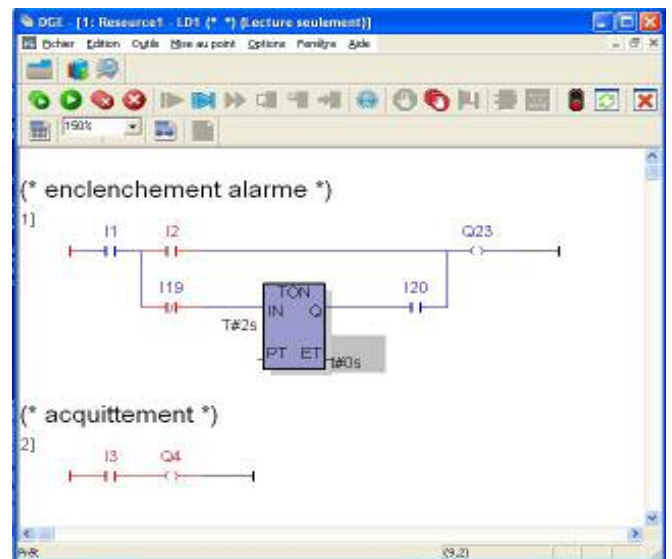

Declaration of Input/output board list
Declaration of networks and protocols
Setting of channel parameters

SFC language

Structured Text language
Syntactical coloration

Ladder Diagram language
Flow Chart language
